

# **The Right Mindset Is Essential To Trading and Investment.**

**Now More Than Ever You Need All The Right Tools To Thrive In This Economic Climate.**

*So here is my SPECIAL GIFT to YOU- at a ridiculously low investment*

**Five whole days where you Learn And Practice  
Twenty One Tools  
That Could Potentially Save Your  
Financial Life  
And You Need To Be There**

It doesn't matter what you do for a living or what system you trade with or invest in whether it be day trading or long term investing, unless you have the right thinking and personal mindset systems behind you, frankly you are just wasting your time and money.

I'm sure you have heard this all before but I'll also place a bet and say you probably have done nothing about securing the essential foundation secrets that the wealthy don't want you to know. Well you're in luck because in this once five day training intensive, I am going to reveal to you the secrets of successful traders. It is time for you to open up your prosperity channel and discover how you can Trade Stress Free.

*IN YOUR HEART*, you know there must be a better way of achieving your dreams: An effective way to get out of the rat race, to improve your health, to be involved with a career you are passionate about and to overcome the fears which hold you back.

**But positive thinking and pop psychology not only fails you, it also makes you feel even more helpless. And even some of the other remedies you've tried don't seem to have worked.**

I am about to give you that better way: A leading technology that's been proven over and over again by thousands of individuals all over the planet that stands conventional psychology on its head - where, as it turns out, it should have been all along.

I'm going to share a maybe little known secret about me that you may or may not know, You see I have worked in twenty countries over four continents and trained over 10,000+ people. To be honest I stopped counting after 10,000! I also built up not one but four successful businesses across all economic climates. What I have taught has made a massive impact to both incomes and more importantly quality of life to literally thousands of people like you.

And guess what, because you were one of the smart people to showed interest in our web site and read our newsletters I have arranged you a special discounted price for tickets valued at INR 250,500 for only INR 83,500. That is right, you only pay 1/3<sup>rd</sup>. Why is it so affordable? Because it is the first time we are doing this workshop in the world. We are bringing together three components: Ability to Control your Feelings and Emotions, Designing Trading Systems that make money (not one but four), and W.D. Gann's Square of Nine (full sixteen techniques that are unique to us).

You must be quick as this revolutionary Trading Intensive Seminar can only accommodate limited number of attendees.

Here is what people have said only after attending a fraction of what I will show you:

Hi Sinan,

Some news I thought you would be interested in.

At first I did not like the second system, saw the value, just did not think I could do it. Anyhow, I am, I have a forex account trade SF against US and it works a treat. Changing it to make my own to work in forex. Love it, so far this is working for me and giving me the step I need and confidence. Starting small but working. margin is not a lot with forex. So good tool to use to get the feel and confidence. Excellent work Sinan. Love your work. Looking forward to the next session at Saturday. Believe me when I tell you I am crying with joy. Even with the changes in the last 3 to 4 weeks bloody amazing. I can not thank you enough.

Warm Regards  
Mark Crisp

Hi Sinan,

Really enjoying you classes. After ten years of studying trading, completing many studies and associated seminars, I still felt like I was missing something. I think that something was simplicity. I was bogged down in all the information and confused about where it would lead me.

The inclusion of statistics and results against your systems is brilliant. Plus the systems are straight forward. It's given me renewed optimism and energy to continue to follow the dream of trading for a living.

Scott Elder

It never ceases to amaze me just how much can be learned in a short time. Re your questions and your answers last week—I must admit that after that whopping big down day, I was dejected and thought that it would have bugged up any trading for a long time—how wrong can a bloke be? Reading your reply was a good kick in the bum for me and amazingly patterns started reappearing—like magic. My Mate Franc brings me Truckloads of Cash.

Many thanks to you for that Sinan—I have 449 ticks in the bank so far this week.

As I mentioned yesterday , I am also in the channel trade—sticking rigidly to the rules and watching.

Geoff Walsh

I have just had the chance to finish watching the recordings of the System Building Webinars and I'll start by saying how much I enjoyed them! I learnt loads about building systems, and more importantly, how to analyse the results and optimize them. I have now went through my systems that I had prior to doing your webinars and have implemented the things I learnt from you. This exercise has been very beneficial.

Michael Pizzino

I did enjoy the webinars - for helping to establish that there are systems available everywhere... simple, straight forward and non-threatening... all I needed to do was find one I am comfortable with, test it and follow it.. the rest takes care of itself...

Thank you for providing this wonderful opportunity to find the system I am comfortable with.. Just brilliant..

Suzie R

Hello Sinan,

Last three Saturdays have been awesome, suddenly trading looks so simple and easy.

All I feel required is trading psychology and trading system that's it.

It is a great pleasure and feeling to be your student.

Thanks

Prashant Golyan

Sinan,

Dear Sinan

I attended your Seminar Building System today. Without doubt, it was the highlight of my 10-year off-and-on involvement with the share market. It truly gave me a surge of focus and meaningful direction in my trading.

Other educators give a titbit of information so as to seduce participants into doing their courses, sometimes costing tens of thousands of dollars. On the other hand, you taught us four complete trading systems which you have used over many years. Your generosity of information was profound. Your instruction did not only embrace the theory, but most of the day was spent in the practical application of the trading systems. You easily could have charged many thousands of dollars, for it was worth it - but you didn't.

Although I have a lot of work ahead of me, I can approach it with the confidence and assurance that your 4 trading systems actually generate real income. Your professional integrity, sincerity and honesty is beyond comparison.

Yours sincerely

Dr Raymond Khoury PhD

If you want to watch them here are two links:

<http://vimeo.com/30837799> Low Bandwidth version

Why would you want to come? Because we are offering complete education. We are teaching you what we are using day by day in our trading. This is not some theory that is picked up from a book. This is solid information on both the research and thinking side of Trading and also the Fear, Greed, Emotional side of trading. Our practical examples are based on Indian Market Index, NIFTY.

The Agenda:

**Trading System based on Moving Averages:** This is one of our favourites because it is simple and easy and does not require any sophisticated program to implement.

**Trading System based on Channel Breakouts.** For those who prefer to take more frequent trades, this method is another simple and easy one and produces higher number of trades.

**Trading System based on W. D. Gann's multiday Swing Charts.** This system irons out the noise from the market and allows you to stay in the longer moves.

**Trading System based on W. D. Gann's measurement of Time Cycles.** This system gives you an assessment of the likelihood of future dates as potential tops and bottoms and a simple method to trade them.

**Square of Nine Techniques:** We will go over sixteen different ways of using Square of Nine with Price Action and Time Dimension and finally the combination of the two. While W. D. Gann used this technique, he did not write much about it. We have compiled this information from multitude of sources, improved it, developed it further, tested it and now bring it to you. You will be among a very select few to know and apply these techniques.

**Habits and Expectancy:** Changing your Beliefs so you can potentially become a Profitable trader and a very Profitable Trader if you are already good.

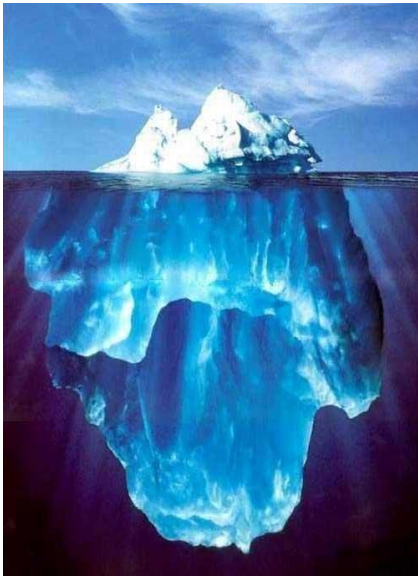

**Primal Emotions:** You can get recognise Fear, Greed, Hope, Panic and release them so you can stay on track. This lesson will show you how.

**Self Help:** You can be your best Trading Friend and your Worst Trading Enemy. What if you had twenty powerful tools at your fingertips when you need them?

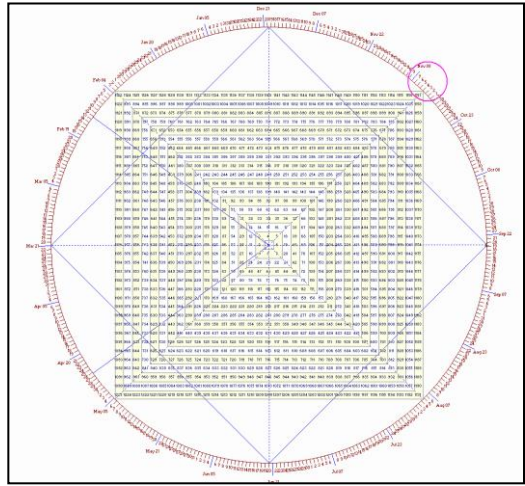

**Success Roadmap:** If you were able to take apart and analyse every successful move you have made and re-assemble the pieces so you can benefit your trading. How you do one thing is how you do everything.

**Self Sabotage:** Most traders take what is a good system and destroy it by trying to make it perfect. What if you knew when you are sabotaging yourself and you were able to stop it.

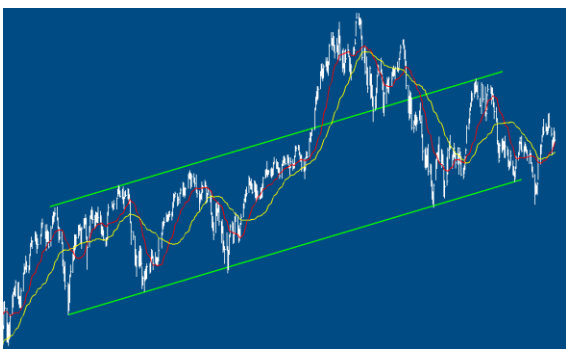

There is so much more we will cover and I can write 30, 40, 50 even 100 pages on it. But I would rather spend my time coming and showing this to you and sharing the information. Why am I doing this? Because I like helping other traders who like to learn. I like sharing what I know. I believe in passing the information on.
